

ADAMS COUNTY FIRE RESCUE

Fire Extinguishers

- Extinguishers can help with small, contained fires.
- Do not attempt to use them with large fires, especially if it's spread to the structure. Instead, get out immediately and call 9-1-1 from another location.
- Extinguishers should be mounted in the kitchen, garage and workshop.
- Purchase an ABC type extinguisher that works with all types of fires.
- Learn how to use your extinguisher before there is an emergency.
