

ADAMS COUNTY FIRE RESCUE

Gasoline and Flammables

- Flammable liquids should only be stored in approved safety containers. The containers should be kept outside the house and garage in a separate storage shed.
- Gas up lawn equipment and snow throwers outside, away from enclosed areas and any sources of sparks or heat.
- Start the equipment 10 feet from where you filled up with fuel.
- Don't fill a hot lawn mower, snow thrower or motor-powered machine. Let it cool down first.
- Never clean floors or other general cleaning with gasoline or flammable liquids.
